02 // Adding Text

In the Project panel open the composition **01. Edit Comps / Text**

There are ten compositions containing the floating words, at the start of the sequence. These are in the sub-folder **Floating Text**.

The main text (your channel identity) is in the composition **Main Text**. Edit the text and change the font, if required. Add more text if needed.

03 // Backgrounds

In the Project panel open the composition **01. Edit Comps / Backgrounds**

Edit the composition named **Background Color** to change the background seen under the floating text, at the start of the sequence. You can use color gradients, still images or video footage.

Edit the composition named **Cloud Background** to change the background seen **inside** the text at the end – currently set to a video of animated clouds. You can use color gradients, still images or video footage.

04 // Rendering

To render simply open the folder **02. Final Comp**

Add the composition **Final Comp** into the Render Queue and **change the render output settings to your requirements.**

Hit render !
