Watercolor Titles – Motion Graphics Template (MOGRT)

// User Guide

Installing the MOGRT file

This MOGRT will only work in Premiere Pro versions CC 2017 and later.

In Premiere Pro go to **Graphics / Install Motion Graphics Template** and locate the .mogrt file.

Adding a Motion Graphic

Drag the template thumbnail from the **Essential Graphics** panel, onto your sequence Timeline. Select the clip on your Timeline to bring up the **Edit** controls.

Notes on Editing

Use the **Color Hue** control to alter the color of the paint drops.

Top and bottom text color is not editable.

Rendering takes a while due to the 3D camera and depth of field effect, so please allow for this.
